

## **SOUTH AFRICAN HUNTING**

South African hunting is the success story of South Africa's wildlife population. Hunting is the single most important attribute to the prolific numbers of game in South Africa.

JWK Safaris is proud to offer you South African hunting at it's best, including hunts on big concessions on a fair chase basis, all our hunting areas are top class destinations selected based on our client's safari requirements and requests.

JWK Safaris specialise in Family groups hunting together, safaris are accommodated in private luxury lodges or rustic bush camps which ever experience suits your requirements, we have a family venue for you that your family will thoroughly enjoy.

The time spent with each other at the dinner table together and around the campfire after the days activities is the perfect way for the entire family to spend time together and reunite bonds.

Each and every hunt is special from the start of the spoor to the end of the track enjoy these moments and let them forever be engraved in your mind and soul.

These memories are always held close to your heart and never forgotten. Family hunts are arranged with fun in mind and easy of travel.

Our most popular outing is a few days in Cape Town our mother city, followed up by 5 to 10 days of hunting safari in one of our hunting camps and then a few days in the Kruger Park to round off the full South Africa experience.

This is one of many options we have that make the Family experience work so well, we will plan the full excursion together making it fit to your family perfectly to create memories never to be forgotten.

If you are interested in an upmarket hunt where game movement is great from the time you start hunting in the morning, until you stop hunting in the evening yet you still insist on a fair chase hunt, then our South African hunting areas will be perfect for you.

The hunting areas have different terrain that are ideal for all hunters whether you are interested in hunting mountains or flat savanna's. These hunting areas will accommodate all hunting requirements and expectations you may have.

Hunting Buffalo in South Africa is truly a wild experience it is of my favourite hunts to guide.

From the first step to the last, Buffalo make you work hard to earn your stripes.

Our hunting's areas cover the 5 major provinces of South Africa giving you the best of all the opportunities available.
